About me

Uruguayan full-stack developer with real experience in demanding work environments and own projects in production. I combine technical skills across frontend, backend, and databases with the ability to analyze data and make decisions based on metrics. I'm looking for opportunities where I can solve concrete problems, keep learning, and contribute from day one.

Experience

Mercado Libre · Fraud Prevention Representative

November 2024 – July 2025 · Montevideo, Uruguay

- Analyzed an average of 60 user profiles per day, evaluating transactions, access IPs, device graphs, and behavioral patterns to identify fraudulent activity.
- Made critical account blocking/enabling decisions based on internal metrics, minimizing fraud while avoiding false positives that would affect legitimate users.
- Worked in a team of 15–20 people, coordinating analysis criteria and escalating complex cases.
- Developed judgment to distinguish risk patterns in high-ambiguity, high-volume environments.

Universidad de Montevideo · Computer Science Lab Assistant

2024 (one semester) · Montevideo, Uruguay

- Provided technical support to students in the Computer Science and Telematics lab.
- Assisted with practical exercises and university software usage.

Projects

reps.io · Workout tracking PWA · reps-io.web.app

React 19 · Firebase · Framer Motion · Recharts · PWA · Vitest

- Progressive web app to create workout programs, log sets in real time, and visualize progress with progression and volume charts.
- Architecture with Firestore data denormalization that reduces reads from ~3,000 to ~70 per active user, optimizing Firebase's free tier.
- 49 unit and component tests covering critical business logic (streaks, progression, volume tracking).

Gallery Demo · SaaS catalog platform for businesses · tienda-galeria-demo.onrender.com · github.com/azael-p/galeria-demo

Node.js · Express · Firebase Firestore · Firebase Storage · Sharp · Vanilla JS

- Full-stack platform for small businesses selling via Instagram and WhatsApp: public storefront + complete admin panel.
- Automatic image optimization to WebP with Sharp, differentiated rate limiting, and real-time sync via Firestore onSnapshot().
- Admin panel with batch image upload, product and category CRUD, and drag-and-drop order management.

Macías & Berriel Law Office · Website for real client, live in production · estudionotarialmb.uy

HTML5 · CSS3 · JavaScript · GitHub Actions · Google Apps Script

- Static single-page site in production for public notaries in Uruguay, with animated hero and five navigable sections.
- Google Maps reviews carousel updated automatically every 24h via GitHub Actions and the Google Places API.
- Contact form connected to Google Sheets with email notifications via Google Apps Script.

Education

Universidad de Montevideo · B.Sc. in Computer Science

March 2023 – Present

Universidad de Montevideo · Computer Engineering (partial)

March 2021 – November 2022

Certifications

The Complete Full-Stack Web Development Bootcamp · Udemy · Dr. Angela Yu · 62 hours ·
